Drinking Water Lead Analysis Reporting

Upon receipt of the laboratory results, the findings will be summarized in a written report. The report will include a description of the sampling procedures, description of sampling locations, and tabular summaries of the analytical results compared to the US EPA National Primary Drinking Water Standard of 0.015 milligrams per liter (mg/L) for lead.

School facilities that were constructed on or after January 1, 1998, may conduct periodic testing under this section.

(2) If the result of a lead level test conducted under subdivision (a)(1) exceeds fifteen parts per billion (15 ppb) but is less than twenty parts per billion (20 ppb), the school shall conduct lead level tests on an annual basis until retesting confirms that the level is less than fifteen parts per billion (15 ppb).

(3) If the result of a lead level test conducted under subdivision (a)(1) is equal to or exceeds twenty parts per billion (20 ppb), the school shall:

(A) Immediately remove the drinking water source from service. The drinking water source shall remain unavailable for use until subsequent retesting under subdivision (a)(3)(C) confirms the lead level of water from the source does not exceed twenty parts per billion (20 ppb);

Client recognizes and agrees that Consultant is acting as a bailee and at no time assumes title to said samples.
10. **HAZARDOUS MATERIALS:** Nothing contained within this agreement shall be construed or interpreted as requiring Consultant to assume the status of an owner, operator, generator, storer, transporter, treater or disposal facility as those terms appear within RCRA or within any Federal or State statute or regulation governing the generation, transportation, treatment, storage and disposal of pollutants. Client assumes full responsibility for compliance with the provisions of RCRA and any other Federal or State statute or regulation governing the handling, treatment, storage and disposal of pollutants. Client acknowledges that some site disturbance is inherent in the work for which Consultant will not be responsible. Should

Client not be owner of the property, then Client agrees to notify the owner of the aforementioned possibility of unavoidable alteration and damage and arrange for the repair of any alteration and damage.

(d) To the best of Client's knowledge, Client agrees to disclose the identity of all utilities serving the Project Site, the presence and accurate location of hidden or obscured man-made objects known to Client that may be in Consultant's work area and the nature and location of any known or suspected hazardous materials that may exist on the property including, but not limited to: hazardous materials listed in the Emergency Planning and Community Right-to-Know Act (EPCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), and the Clean Air Act (CAA).

(e) Consultant's job site activities do not change any agreement between Client and any other party. Only Client has the right to reject or stop work of its contractors or agents. Our presence on site does not in any way assure the completion, quality or performance of the work by any other party retained by Client to provide field or construction/remediation services. We are not responsible for, and do not have control or charge of, the specific means, methods, techniques, sequences or procedures of construction or remediation selected by any contractor or permittee of Client.

(f) Client shall provide prompt written notice to Consultant if Client becomes aware of any fault or problem in the project, including any errors or omissions in Consultant's work.

Any certification by Consultant is limited to an expression of professional opinion based upon the Services performed by the Consultant, and does not constitute a warranty or guarantee, either expressed or implied.
